Remove Complexity & Streamline Operations

Zenkraft is the leading Salesforce-native multi-carrier shipping application that bridges the gaps between fulfillment operations and the consumer experience. This allows our customers to generate shipping quotes, manifest shipments, track delivery, and manage returns from one system - seamlessly. We help manufacturers:

- **Tap into 130+** pre integrated parcel, LTL and same day carriers
- **Power accurate cost estimates** and options for delivery, including shipping costs as part of a job quote
- **Automate fulfillment operations.** Create and print shipping labels and documents using Salesforce Flows
- **Connect warehouse operations** to the invoicing process
- **Leverage tracking visibility** and dashboards for enhanced reporting

AppExchange

Shipment Tracking

Tracking details are automatically updated as the items move through delivery with real-time tracking of shipments for warehouse, store, and customer support teams. Branded tracking notifications at each critical delivery stage keep customers informed and enhance the end-to-end experience.

Rates & Cost Estimates

Achieve higher quote accuracy and save time. Leverage a product's weight and/or dimensions to add estimated shipping costs to a quote, and retrieve the latest negotiated and published rates directly from carriers.

UPS Next Day Air® Early	1642.61	USD	1	2023-12-07

Returns Management

Create a smooth returns process for ecommerce consumers using Salesforce Commerce Cloud, and for customer service users via service applications like Salesforce Service Cloud.

- Easily create returns shipments/manifests from any object in the platform
- Include RMA numbers on return labels for inbound warehouse scanning
- Schedule pickups and track the return delivery status
- Provide return shipping for product cores, returns for calibration, or warranty claims

About Zenkraft

Zenkraft works with any Salesforce Object or Cloud, including other Salesforce built ERP and WMS applications, integrating logistics operations into your Salesforce environment, seamlessly.
